SSH Programme – characteristics of policy relevant research

- **Issues of interest for European policy making**
- **Highest academic quality**
- **Interdisciplinary, often comparative empirical research, incl. data collection**
- **Taking stock and building up research on the already existing knowledge with special focus on EU funded projects**

Making longevity an asset for economic and social development

Objective:

To comprehensively assess challenges and opportunities related to transforming longevity into an asset for economic and social development in Europe.

Policy context and rationale:

- **Europe 2020 Strategy - Innovation Union – European Innovation Partnership on Active and Healthy Ageing – increasing the average healthy lifespan by 2 years by 2020**
- **Challenges and opportunities related to ageing society need a comprehensive approach – EC Communications on demography and Demography Reports**
- **Challenges related to projected shortages of labour force and sustainability of pension and welfare systems**
- **A need to take advantage of the potential of the older people as consumers and identifying related market opportunities for Europe**
