

MSCA

Marie Skłodowska-Curie Actions

Marie Skłodowska-Curie Actions – as a part of 1st pillar of [Horizon Europe](#) – fund excellent research and innovation and equip researchers at all stages of their career with new knowledge and skills, through mobility across borders and exposure to different sectors and disciplines. **The MSCA help build Europe’s capacity for research and innovation by investing in the long-term careers of excellent researchers.** By doing so, they achieve a structuring impact on higher education institutions, research centres and non-academic organisations.

The MSCA promote excellence and set standards for high-quality researcher education and training in line with [the European Charter for Researchers](#) and the [Code of Conduct](#) for the recruitment of researchers.

MODELLING FOR PUBLIC POLICY PURPOSES (MPP)

INSTITUTE OF ECONOMICS, PAS

DIVISION I - HUMANITIES AND SOCIAL SCIENCES

JAGODA.KASZOWSKA@INEPAN.WAW.PL

+48 607 329 613

EXPERTISE

Our research team is focused on creating models for simulating and forecasting public policy. In particular, we are interested in providing insights about the effects of potential, not yet implemented, policies for the economy, financial system, and society. We have worked on financial stability, systemic risk, and the welfare effects of macroprudential policies. Currently, we are working on incorporating AI components within agent-based models.

We investigate how tumour hypoxia and the H3K27M oncohistone can be exploited for therapeutic benefit. We apply CUT&RUN, ATAC-seq and chromatin capture to identify druggable vulnerabilities in DMG cells and their microenvironment. We study hypoxia-driven chromatin reprogramming, evaluate H3K27M-dependent gene targets, and explore strategies to eliminate the detrimental oncohistone from DMG cells.

SEEKING FOR COLLABORATION WITHIN

tumour microenvironment, mouse glioma models, paediatric high-grade gliomas, epigenomics, radiotherapy
